BUREAU OF INFORMATION.

BUREAU OF PROVINCIAL INFORMATION.

IN ORDER that the Government may be in possession of definite information with which to supply those seeking investments in this Province, I am instructed to invite particulars from those who have properties for sale, and who may feel disposed to forward such particulars to this office for the purpose in question.

In view of the proposed early re-organisation of the Agent General's Office in London, England, the desirability of having on file a list of farms and other properties for sale, with full and accurate details, is obvious. Properties submitted may include farms and farm lands, industrial or commercial concerns, timber limits, water powers, or other enterprises affording opportunities for legitimate investment.

It is not proposed to recommend properties to intending investors, but to afford the fullest access to the classified lists and all available information connected therewith, and to place enquirers in communication with the owners.

The fullest particulars are desired not only of the properties themselves, but of the localities in which they are situated, and the conditions affecting them. For this purpose printed schedules will, upon application, be forwarded to those desirous of making sales.

Secretary, Bureau of Provincial Information.

VANCOUVER CITY BY-LAWS.

BY-LAW No. 366.

A By-Law defining the Fire Limits and to regulate the erection of Buildings, and to provide for the appointment of and define the duties of a Building Inspector.

WHEREAS it is deemed expedient to define the fire limits of the city and regulate the erection of buildings, and to provide for the appointment and to define the duties of a Building Inspector:

Be it therefore enacted by the Mayor and Aldermen of the Corporation of the City of Vancouver:

1. The Council shall from time to time appoint a competent and practical architect or builder to be inspector of buildings and of fire limits, at such a salary as the Council may think fit to provide. The person so appointed shall be called the Building Inspector, and shall hold office during the pleasure of the Council.

Oath and Bond.

2. The Building Inspector shall, before he enters on the duties of office, take and subscribe an oath to faithfully and impartially execute the duties of his office, and shall give bond in the sum of two thousand dollars, with two or more sufficient sureties to be approved by the City Solicitor, conditional for the faithful performance of his duties, and shall devote his entire time to the same and such other duties as this Council may from time to time prescribe.

Duties of Inspector.

3. It shall be the duty of the Inspector to issue permits for the erection, enlarging or alteration of buildings, in accordance with the provisions of this by-law; keep a record of the same, with a description of the construction, sanitary appliances, heating apparatus, electric apparatus, elevators, and all matters relating to the construction or alterations of buildings in the city.

It shall be the duty of the Inspector, on receipt of an application for a permit, accompanied by the plans and specifications of the proposed building or alteration, to carefully examine the same and ascertain if the supports, beams and construction of the proposed building or alteration are properly shown in the said plans and described in the said specifications, and are

in accordance with the provisions of this by-law. If the Inspector is satisfied that they conform to this by-law, he shall, within a period of five days from the date of application, return said plans and specifications and issue a permit, as hereafter provided for. If they do not conform to this by-law, he shall refuse to issue such permit.

It shall be the duty of the Inspector, on the issuance of a permit, to transmit to the City Engineer the requisite notices for levels, drains, and for the use of streets or lanes for building material; and he shall notify the Superintendent of the Water Works of the services required, and shall further transmit to the City Treasurer's office a statement of all fees and water rates to be paid in connection with the erection or alteration of the building.

The fees to be paid for permits for the erection or alteration of buildings shall be:—

For buildings costing less than \$1,000	\$1
For dwellings costing \$1,000 or over	1.50
For business buildings, \$1,000 or over	2
For the use of streets and sidewalks, 10 cents per day for every 25 feet of frontage.	

4. The Inspector shall examine all buildings in course of erection or alteration as often as practicable, and in case of violation of the provisions of this by-law, and refusal to comply therewith, he shall report the name of the owner, architect, builder or master mechanic concerned in the building where such violations have occurred, and all other matters relative thereto, to the Chief of the Police, that proceedings may be taken against the party or parties concerned, according to law; and it shall be the duty of the Chief of the Police, on the request of the Inspector, to prosecute all parties infringing this by-law.

Rights of Inspector.

5. The Inspector shall have the right to enter any building in course of construction, alteration or enlargement, or any building which has been reported to him as defective or in a dangerous condition, or which he has reason to believe to be in a defective or dangerous condition, either in regards to its construction or sanitation. In case of an appeal from a decision of the Inspector, any member of the Board of Appeal shall have the same right.

6. The Inspector shall have the right to enter any building damaged by fire or through accident, and to examine the same with a view to ascertain the cause of the accident and the condition in which the fire or accident has left the building, and make and keep an official record of the same.

He shall also have the right to examine buildings or premises, with a view to ensure the safe storage of combustibles, as hereafter prescribed in this by-law or the "Fire Prevention By-Law," and to report the same.

7. The Inspector shall have full power to pass upon any question arising under the provisions of this by-law, relating to the manner of construction or materials to be used in the erection, alteration or repair of any building, or respecting the steps necessary to be taken to ensure the safety of any building that has been reported or is known to the Inspector to be in a dangerous or defective condition in regard to its construction.

8. The Inspector shall have authority, if he finds any building or part thereof, or any staging or any structure, in such a condition as to endanger life or limb, and wherein the immediate adoption of precautionary measures, or by the demolition of the dangerous portion of said building, staging or structure, such danger may be averted, to cause such precaution to be taken, or demolition to be made, or to cause such work to be done as may be necessary to render such building or part thereof, or staging or structure safe, after having given notice, either in writing or personally to the owner, lessee, occupant, contractor or agent of said staging, building or structure, and the Building Inspector shall have the right to enter upon such building or premises, with such assistance as he may require, and have such building, staging or structure secured or taken down and the public protected, at the expense of the owner, contractor, builder, occupant, lessee, or other party interested; and the costs incurred by the Inspector in the performance of such work shall be paid for out of an appropriation to be voted by the City Council at the beginning of each fiscal year, and any portion of said appropriation expended by the Inspector in the execution of such work shall be accounted for by him from time to time, as may be determined by the Council, to

be recovered with costs from the owner or owners, contractor, builder, occupant, lessee or other parties interested, in any Court having jurisdiction in the matter. Should such work as hereinbefore mentioned be urgent, and in the opinion of the Inspector require to be done without the delay necessary in notifying the owner, contractor, builder, occupant, lessee, agent or other party interested, he shall have the right to have the work done and to recover the cost of the same as hereinbefore provided, or to assess the cost against the property, and the same shall be assessed against the property in the same manner as overdue taxes.

9. When the Inspector is satisfied that any building or structure, or portion thereof, is being erected, constructed or altered in violation of or not in compliance with the provisions of this by-law, or in violation of the statement, plans and specifications submitted to and approved of by the Inspector, or of any permit issued by him, or that any order or direction made thereunder has not been complied with, he shall serve the agent, owner or agent of owner with a notice to remove such violation immediately after the serving of such notice. In default of compliance with such notice to the satisfaction of the Inspector, he may, in his discretion, institute an action or proceeding at law against the owner or owners before any Court having jurisdiction therein, to restrain, correct or remove such violation, or to prevent the occupation or use of any building or structure erected, constructed or altered in violation of the provisions of this by-law, and said Court shall, unless the decision of the Inspector has been set aside or reversed by the Board of Appeal, hear the parties in the said case and give judgment thereon, or shall issue an order enjoining and restraining all persons from doing work upon such building or structure, or from occupying or using such building or structure until the hearing and determination of said action and final judgment thereon. No officer of said department, acting in good faith and without malice, shall be liable for damages by reason of anything done in such action or proceeding.

10. Should any question arise between the Inspector and the owner, contractor, builder, occupant, lessee, agent or other parties interested, or should any of the said parties object to the order or decision of the Inspector, they shall have the right within three days after the giving of such order or decision to appeal from the same to the Board of Appeal.

Should the Inspector refuse to issue a permit as required by this by-law, the applicant for such permit shall, within three days after such refusal, have the right to appeal from said decision to the Board of Appeal.

Should the Inspector incur any expense chargeable to an owner, or should he order any person to incur expense, the said owner or person shall have the right within three days after the issuance of such order to appeal from the same to the Board of Appeal.

Any person appealing from any order or decision of the Inspector as herein described, shall, within the time above mentioned, give notice to the Inspector in writing that he does appeal.

11. The said Inspector of Buildings shall be responsible for the safe-keeping of the plans and specifications in this by-law provided for, and shall on request give the person filing the same, a certificate of the date of such deposit.

Board of Appeal.

12. The Board of Appeal shall consist of the Mayor and Council for the time being of the City.

13. No person shall commence or carry on the enlargement, erection, alteration or repair of any building or part of a building of a cost of one thousand dollars or more, within the City, until he shall have deposited with the Building Inspector complete plans, elevations and specifications of the proposed building or part of a building, together with a ground or block plan showing the level of the cellar and basements thereof, with reference to the grade line of the adjoining street or streets, as laid down or recorded in the office of the City Engineer, and also a description showing the materials with which the walls of the building are to be constructed, and has obtained a written permit from the Building Inspector to proceed therewith. No one shall pile on the sidewalk or street any earth taken from the site of the building proposed to be erected, repaired or altered, except such as may be required to be returned for subsequent use therein.

20. Unless the Building Inspector grants a permit to use the sidewalk as aforesaid, the builder or builders of any building to be erected or altered or repaired shall, before commencing work thereon or making any excavation therefor, erect over the sidewalk or footway in front of such building a scaffold or independent structure, of the width of the sidewalk and eight feet high at least above the level of the sidewalk or footway, which scaffold or independent structure shall be planked over the entire length and breadth of the building to be erected, altered or repaired, with two layers of two-inch plank, laid to break bond properly, and such portion of the sidewalk or footway shall be enclosed longitudinally on both sides to the height of the scaffold with strong board fences, so that the said sidewalks of the street may at all times be left free for public use, and upon the sidewalk being so covered or fenced, the portion of the street outside the sidewalk which may be used for the use of material shall be fenced in with a strong board fence six feet high, but it shall not be in that case necessary to make any platform for foot passengers outside of it.

21. When the scaffold extends over the sidewalk as mentioned in clause 20 of this by-law, the joists, posts and coverings must be of the sizes directed by the Building Inspector. When permission is granted to lay a sidewalk outside of the enclosure as aforesaid, it shall be laid in the manner and of the kind and sizes of material directed by the Building Inspector. All gates into enclosures shall open inwards, and not across the sidewalk or street.

22. The said Building Inspector shall not grant a permit to use any part of the streets or sidewalks of the said city if the building to be erected, or the repairs or alterations to be made, are contrary to this by-law.

23. No permit granted under this by-law shall authorise the obstruction of the streets or sidewalks as aforesaid for more than one week prior to the commencement of the excavation for the erection or repair of any such building, or shall be for a longer period than four months, but such permit may be extended by the Inspector from time to time on sufficient reasons being shown, but so that no extension at any one time shall exceed three months, and the whole period of the permit and extensions thereof (if any) shall not exceed in all twelve months, except by special authority of the Council, and every such permit or extension thereof shall become null and void upon the holder thereof not complying with the terms of such permit or otherwise violating any of the provisions of this by-law, or upon the work being finished. If work is stopped on the building for two weeks, the permit shall become null and void.

24. No person shall interfere with or remove any sidewalks, or place any building material, plant, or any material of whatsoever kind upon any sidewalk or street in the said City, unless he shall have first received a permit to do so from the Building Inspector as aforesaid, nor shall any person suffer or permit any building material or plant brought by him upon any

street or sidewalk to remain any longer than during the duration of the permit of the Inspector, or any extension thereof, or whilst the same remains in force; and on the completion of the walls and outside work of any such building, or upon the expiration of the permit of the Inspector, the owner, builder, or other person who has brought any such material or plant upon any such street shall immediately remove all such material or plant from the street or sidewalk, and cause the street or sidewalk to be cleaned or repaired, and relaid and placed in as good condition and repair as the same were in before such material or plant were placed thereon. As soon as the work in connection with each trade is completed, the material and rubbish belonging thereto shall be removed without delay.

The owner of the property being built upon, as well as the contractor, shall remove rubbish after the building is completed, or as above set forth, when ordered to do so by the Building Inspector, if, in his opinion, it should be removed.

25. In all cases where any person or persons shall leave or place any material to be used in connection with the building, or rubbish, upon any of the streets or sidewalks of the said City, such person or persons shall be answerable for any damage which may be occasioned to persons, animals, or property by reason of such material or rubbish being so left or placed.

permit was granted, the thickness of the walls thereof shall also be increased in accordance with the above table.

33. If solid buttresses are used for a sectional area of 300 or more square inches, placed less than 18 feet apart, and extended to or nearly to the tops of the walls, four inches may be deducted from the thickness of any wall having such buttresses, but the minimum thickness of any part shall be eight inches.

34. Any party wall that shall have been built conformably to the requirements of any law regulating the construction of such walls, and in force at the time of such construction, if sound and in good condition, may be used in the construction of any adjoining building: Provided, however, that no brickwork shall be placed in such wall to give additional height to the wall unless the thickness of such additional and the thickness of the old wall in each story shall at least equal the thickness required for division walls of the same height for buildings required for division walls. This section shall apply in all cases where it is desired to add additional height to business buildings. In case of outside walls of any business buildings being built against the wall of any old building (not being a party wall), the new wall shall be of the same thickness as required for outside walls in such building.

35. Buildings having flat roofs shall have their front and side walls carried two feet above the roof, with copings of incombustible material.

36. Provided that any dwelling, cottage or barn may be constructed with walls of non-combustible material four inches less in thickness than above specified, but not in any case less than eight inches.

37. All material and work which are considered by the Building Inspector to be defective or unsafe, shall be at once removed and replaced by satisfactory material and workmanship.

38. Breast summers in all cases shall be carried on brick or stone walls or piers, or on cast iron columns seated on stone, or resting on an iron plate of not less thickness than two inches, and shall in no case be carried on story posts or other timber supports, and when the ends of any breast summer shall approach the centre line of any party wall nearer than four inches and a half, such ends shall be encased and entirely surrounded in cast iron shoes. Cast iron column supporters of brick or masonry walls must in no case exceed in height thirty times the diameter of said column in buildings more than thirty feet in height.

39. All floor beams, joists and headers shall be kept at least two inches clear of any wall enclosing a fire flue or chimney breast, and the space left between the framing and such flue shall be filled solid with gauged mortar. There shall be put on the walls of such flues, before any woodwork is placed against it, a heavy coating of plastering.

40. Ends of joists or beams entering a brick wall shall be put so as not to disturb the brick work by any defection or breaking of the joists or beams.

41. All joists and girders in any building shall be of proper dimensions, adequate to sustain the load designed to be placed upon them. All floor joists shall be properly bridged with cross bridging. All headers in floor framing of business buildings that are placed at a greater distance than two feet from the end of a trimmer shall be fixed in proper iron stirrups.

42. No window sills, dressings, string courses, eave troughs, cornices or other details or ornaments in any way projecting from the face of the external walls, or surmounting the same, shall be fixed to any such walls above the line of the shop fronts of any building, or surmount the party walls thereof, unless such details, dressings or ornaments shall be constructed of stone, brick or iron, or shall be completely covered with iron, tin, zinc, copper or some other material of a non-combustible nature.

46. The roof of any frame building that is more than one story high that is damaged by fire or other cause may be repaired, provided that the cost of such repairs does not exceed 20 per cent. of the value, in the opinion of the Council, of the whole building intended to be repaired. In no case shall the highest point of the new roof exceed the highest point of the old roof, but if a flat roof is substituted for a pitched roof the walls of the building may be extended to meet the requirements of such change in the pitch of the roof, but in no case shall the building be altered so as to add an additional story.

47. 63. Whenever such house or other building is about to be erected it shall be the duty of the person about to build the same to notify the Building Inspector, who shall immediately inspect the ground to see that the provisions of this by-law regarding the clearing of the lot on which the building is to be erected, have been carried out.

68. No timber shall be laid within two feet of the inside of any oven, copper still, boiler, or furnace, unless protected by at least twelve inches of brick or other incombustible material.
